

"EMERGENCY HEALTH AND SAFETY"

As active young people growing up, there are numerous situations, areas and places where they can hurt themselves. Prevention is much better than cure.

Also, many people in Australia, particularly our youth, suffer from Asthma, and in a school environment it is highly desirable for all students and staff to have an informed awareness on the subject.

A step by step guide is included on Emergency Asthma, Resuscitation and also contained is the National Poisons' Hotline.

To encourage an awareness in their minds of their surroundings and possible hazards that they may encounter, a number of focuses have been included:-

Junior	Road Safety	pg. 116
	Home Safety	pg. 118
	Water Safety	pg. 120
	Sun Sensible	pg. 121
	Health and Safety at School	pg. 122
	Health and Safety to and from School	pg. 123
	First Aid: Resuscitation	pg. 128
	First Aid: Poisons' Hotline	pg. 129
	First Aid; Asthma	pg. 129
Middle	Water Safety	pg. 124
	Sun Sensible	pg. 125
	First Aid: Resuscitation	pg. 130
	First Aid; Asthma	pg. 131
	First Aid: Poisons' Hotline	pg. 131
Senior	Sun Sensible	pg. 137
	Resuscitation	pg. 150
	Asthma: Emergency	pg. 151
	Poisons' Hotline	pg. 151

The purpose of these focuses is to promote a **thinking** approach to Emergency Health and Safety.

Should you have any queries or concerns regarding your son/daughter's progress please do not hesitate to contact his/her Year Level Co-ordinator/Advisor.

"Always be prepared." Lord Baden Powell
